

I fully support this petition for rule making as stated. I believe this petition to be a balanced approach to take the Amateur Radio service forward into the next decade and beyond.

I would also support consideration of certain provisions for testing guideline changes included as part of other petitions. Specifically the establishment of a minimum 10 day waiting period prior to retesting and multiple, substantially different, versions of examination question sets used over a 30 day period in order to eliminate the administering of the same examination question set to the same individual within a 30 day period.
